17000 RPF vacancies : 31.03.15

The 66th Republic Day celebrations were held at ICF Stadium. Shri Ashok K Agarwal, GM/ICF, unfurled the National Flag and inspected the parade by RPF, NCC cadets, Scouts & Guides, apprentices of TTC and children of ICF schools. During his speech GM has mentioned that ICF has turned out the highest ever 1622 coaches during the last production year and more than 49000 coaches so far, since its inception. Overall performance of ICF during 2013-14 has resulted in Railway Board awarding ICF the "BEST PRODUCTION UNIT" shield. ICF was also awarded First Prize in the National Energy Conservation Award in Dec for the second consecutive year for its energy conservation initiatives. Hon'ble MR has launched ICF-built CNG train by flagging off the train on the Rewari-Rohtak section on 14th Jan. For the first time ICF manufactured three variants of LHB EOG shells in 2013-14. ICF has planned to turn out 67 LHB coaches in 2014-15 and 300 coaches in 2015-16.

CIRCULARS

- MR has asked senior officials to submit a list of unproductive staff in each department.
- MR has said that railway stations that cater to few trains and attract scanty footfalls can be used for skill development activities.
- Based on email received from an RTI activist, MR has asked CR officials to conduct an enquiry and take action against RPF officials who rented out the Railway Ground at Mulund for private functions, collected rent.
- Hon'ble MoSR, Shri Manoj Sinha, flagged off Manduadih- Ghazipur- Chhapra DMU train through video conferencing from Ghazipur City Railway Station.

➤Russia is set to build the world's longest high speed train from Moscow to Beijing- 7000km in just 48 hours, which now takes seven days.

Habits of Highly Effective People

by Sri V. Jayapragash, SME/MRVC/F,
Ph:9003141441, jayapragash.2008@rediffmail.com

LACK OF LIFE BALANCE:-

Life in our cell phone society is complex, demanding, stressful, monotonous, and absolutely exhausting. For all our efforts to manage our time, do more, be more and achieve greater efficiency through the wonders of modern technology. Why is it we increasingly find ourselves in the “thick of the thin things” –subordinating health, family and many of the things that matter most to our work? The problem is not our work, which is the sustaining engine of life. It is not the complexity (or) change. The problem is that our modern culture says, “Go in earlier, stay later, be more efficient, live with the sacrifice for now-but the truth is that balance and peace of mind are not produced by these, they follow the person who develops a clear sense of his (or) her highest priorities and who lives with focus and integrity towards those priorities.

WHAT’S IN IT FOR ME?

Our culture teaches us that if we want something in life, we have to “look out for number one”. It says, “Life is a game, a race, a competition and you better win it.” Schoolmates, colleagues, even family members are seen as competitors – the more they win the less there is for you. Of course we try to appear generous and cheer for others’ success, but inwardly, privately, so many of us are worried when others achieve.

True greatness will be achieved through the abundant mind that works selflessly-with mutual respect, for mutual benefit.

THE HUNGER TO BE UNDERSTOOD

Few needs of the human heart are greater than the need to be understood – to have a voice that is heard, respected, and valued – to have influence. Most believe that the key to influence is communication getting your point across clearly and speaking persuasively.

In fact if you think about it, don’t you find that while others are speaking to you, instead of really listening to understand, you are often busy preparing your response? The real beginning of influence comes as others sense you are being influenced by them- when they feel understood by you- that you have listened deeply and sincerely, and that you are open.

However, the principle of influence is governed by mutual understanding born of the commitment of at least one person to deep listening first.

CONFLICT AND DIFFERENCES:-

People share so much in common, yet are so magnificently different. They think differently, they have different and sometimes competing values, motivations and objectives. Conflicts naturally arise out of these differences. Society’s competitive approach to resolving the conflict and differences tends to centre on “winning as much as you can”. Though much good has come from the skillful art of compromise, where both sides give on their

positions until an acceptable middle point is reached, neither side ends up truly pleased. What a waste to have differences drive people to the lowest denominator between them. What a waste to fail to unleash the principle of creative co-operation in developing solutions to problems that are better than either party’s original notion.

The author elaborates personal stagnation as follows.

Human nature is four dimensional - body, mind, heart and spirit. Consider the differences and fruits of the two approaches.

Body:

Cultural tendency: Maintain lifestyle; treat health problems with surgery and medication.

Principle: Prevent diseases and problems by aligning lifestyle to be in harmony with Established, universally accepted principles of health.

Mind:

Culture: Watch television, “entertain me”.

Principle: Read broadly and deeply, continuous education.

Heart:

Culture: Use relationships with others to forward your personal, selfish interests.

Principle: deep, respectful listening and serving others brings greatest fulfillments and joy.

Spirit:

Culture : succumb to growing secularism and cynicism

Principle: Recognise that the source of our basic need for meaning and of the positive things we seek in life is principle- which natural laws he personally believe to their source in God.

As you commence reading 7 habits of highly effective people, I promise an exciting experience and learning adventure. Share with your loved ones, what you are hearing. And most important, that starts applying what you are learning. Remember to learn and not to do is really not to learn. To know and not to do is really not to know.

The author says “I have personally found living the 7 habits a constant struggle – primarily because the better you get, the very nature of the challenge changes, just like skiing, playing golf, tennis, or any sport does. Because I sincerely work and struggle every day at living these principles embodied habits, I warmly joint you in this endeavor”.

Habits will grow.....

22801 Dep VSKP 1900/Fri, Arr MAS 0935/Sat. 22802 Dep MAS 0910/Sat, Arr VSKP 1130/Sun.

RITES will supply 120 BG coaches in next 24 months to Bangladesh Railway with Indian funding.

IOCL has lost to RIL the contract for supplying diesel to IR.

ABOUT ICF - Part II

by Sri R.Srinivasan, APE/PR/F,
Ph:9003141449, rsrinivasanicf@gmail.com

Delivery Time

- 25 Calendar days for lots value up to Rs.3 lakh.
- 50 Calendar days for lots value above Rs.3 lakh.
- Ground rent at the rate of 0.5% of the value of the lot quantity/portion not removed per day subject to a minimum of Rs.100/- will be charged from the date of expiry of the delivery date.

Other Conditions

- If the balance sale is not remitted within the due date ICF reserves the right to forfeit the EMD.
- ICF also reserves the right to forfeit the EMD/Sale value either full/part if the sold material is not removed within the delivery period.
- Delivery date extension may also be given at the discretion of ICF.

Delivery

- Delivery of scrap will be made only against Sale order/Delivery order after remittance of sale amount.
- Sale delivery point/s should be booked by the purchaser with the Depot concerned in advance.
- Depot will prepare a Sale Delivery program one day in advance and send it to ISA & IPF for deputing staff for witnessing. A copy will also be marked to Vigilance as per the extant procedure.
- On the day of delivery the truck/s will be weighed for taking tare weight in the presence of witnessing officials viz. DMS/CDMS, SV, RPF & Party.
- Materials will be permitted to load in to the truck from the sold lot in the presence of witnessing officials.
- Final weighment will be taken to get the net weight for entering the quantity in the sale issue note and gate pass which will be signed by the witnessing officials, scrap ward DMS and the Depot officer.
- On completion of the SO/DO completion report will be sent to sale section for record.

INVENTORY CONTROL:

INVENTORY:

- Different items of stores held in stock are collectively known as Inventory, measured in terms of total money value.
- Different items include raw materials, components, consumables, semi finished, finished products required for operational smoothness.

INVENTORY CONTROL:

- Method by which inventory holding is regulated within the predetermined limits stipulated by the management from time to time.
- Modern tool of planning, forecasting storing and distributing

Objective:

- To keep down the investment on the inventory, inventory carrying cost and obsolescence occur due to sophisticated and modern items in the passage of time.
- Helps in maintenance of Inventory at the optimum level.

INVENTORY CARRYING COST:

Includes

- Cost of warehousing of inventory (labour, overheads like elec , water maintenance and material handling equipments)
- Interest on locked up capital
- Opportunity cost is the locked up capital that could have been used profitably otherwise)
- Cost of loss due to shrinkage, evaporation, handling pilferage, deterioration, depreciation, obsolescence
- Generally inventory carry cost is 30 % of inventory value

INVENTORY TYPES:

- Production, maintenance, WIP, finished products.

Essentials of inventory control:

- Proper care for forecasting of demand
- Proper care on provisioning
- Identification of surplus stores and this disposal
- Variety reduction
- Care in introduction of new items
- Disposal of overstock , scrap
- Make or buy decision

MODERN TECHNIQUES:

ABC analysis:

- Based on Pareto's law of "Vital few Trivial many techniques".
- Stocked items are classified in to 3 types as A,B&C
- A category: 5 % of total no of items which consumes 70 % of annual usage value of total consumption
- B category: 15 % of total no items value for about 20 % of annual usage value
- C category: Remaining 80 % items value for just 10 %
- Purpose is to identify and separate the predominant few items cost from the others
- A high level of control
- B medium level of control
- C not much of control

Over / excess stock

- A category – exceeding 6 months
- B category – exceeding 12 months
- C category – exceeding 24 months

FSN Analysis: FAST, SLOW , NON MOVING

- Based on rate of consumption
- Kept in mind while recouping
- More stock for fast moving
- Least stock for slow moving
- Alternate for non – moving

VED Analysis: Vital, essential , desirable

- Based on stock out cost and thin service level requirement
- Vital: Non availability of these items will immediately stop the equipment e.g : fuels, maximum service level
- Essential: non-availability will not stop immediately but in future e.g. Lubricants, Medium service level
- Desirable: Despite non-availability of these items the equipment will continue to work with the same efficiency e.g: fans, mirror, Minimum service levels.

HML analysis: HIGH, MEDIUM, LOW.

- ABC for total consumption
- H Category to have highest level of control

SDE: Scare, difficult, easy:

- According to availability in the market
- Scare- more stock
- Difficult - average stock
- Easy- low stock

SOS : Seasonal , off seasonal

GOLF: Government , Ordinary, Local , Foreign.

To be continued

- ✓ Hon'ble Prime Minister Shri Narendra Modi has launched 'Beti Bachao Beti Padhao' (save daughter, educate daughter) campaign to tackle dwindling number of girls.

Frequently Asked Questions from Readers and Patients

Q15. I play 2 roles as a home maker and desk worker. I am unable to find time do exercise regularly .Give some tips to find a way to live with minimal strain in desk work /home work?

I agree a little that it is a tough task for many people like you, to find time for regular exercises. But first of all for exercising you need mind rather than time. Each bit of efforts helps you, and after a while, it can become habit forming.

Ok! Here are some tips to minimise the strain back for busy people like you!

1. Maintain good posture as much as possible while doing home/office work.
2. Maintain ideal body weight.
3. Establish proper office ergonomics (Working environment) and healthy back home environment.
4. Lift the things, either small or big, in a safe way. (See earlier issue Dos &Don'ts).If you need help don't hesitate to get it.
5. Avoid sitting /standing for extended periods.
6. Have frequent little walk, either desk to desk or at least around your desk.
7. Along with your coffee break have a small health break once in couple of hours and do some stretching exercise at your desk as in pictures. Number of repetitions 1-3.

1. Back muscle stretching

- ✓ Come to the front of the seat and sit comfortably.
- ✓ Bend over the thigh slowly.
- ✓ Stay for 5-10-15 counts gradually in mind.
- ✓ Come back, relax and repeat.

2. Arch the back

- ✓ Sit comfortably on a chair.
- ✓ Keep both the palms over the low back.
- ✓ Bend backwards and extend the neck and back comfortably.
- ✓ Stay for 5-10-15 counts
- ✓ Back to beginning, relax and repeat.

Variation: standing position

- ✓ Stand up and place your both palms on your low back.
- ✓ Gently push your hips forward and arch your back slightly.
- ✓ Stay for 5-10-15 counts and return to normal posture.
- ✓ Relax little and repeat.

1. Leg muscle stretching.

- ✓ Sit at the edge of the seat.
- ✓ Stretch one leg with straight knee & heel resting on the floor.
- ✓ Flex the foot upwards in the direction of the upper body
- ✓ Hold it for 5-10 -15 counts and then return to relaxed position.
- ✓ Repeat same with other leg.

Progression:

- ✓ Sit stable as above.
- ✓ Stretch one leg with straight knee.
- ✓ Slowly bend at waist and touch the toe.
- ✓ Stay for 5-10-15 counts.
- ✓ Come back; repeat on the other side.

3. Hip Muscle stretching:

- ✓ Sit comfortably on your seat.
- ✓ Fold left leg across right knee and rest over the right leg.
- ✓ Bend forward from waist gradually dropping the chest towards the thigh & crossed leg.
- ✓ Try to reach the relaxed hands as much as possible to the floor.
- ✓ Retain for 5-10-15 counts and Return back to relaxed sitting.
- ✓ Repeat the same procedure on right leg.

4. Rotational stretch

- ✓ Sit on a chair with backrest, with your sides against it.
- ✓ Hold the top of the backrest with hands.
- ✓ Twist the upper back and turn towards the back rest.
- ✓ Hold it for 5-10-15counts and then relax.
- ✓ Repeat the steps on other side.

Caution Note: Don't do the above exercises in a moving chair. If it is so, place the chair against the wall.

Variation: If you have privacy, get down on the floor and do this one at your work place or do at your home at the end of the office day (Picture 2).

- ✓ Lie down crook lying (bent knee position).
- ✓ Roll your bent knees to right position until you feel stretch on side muscles.
- ✓ Hold it for 5-10-15 counts.
- ✓ Return to starting position.
- ✓ Relax & repeat on left side.

Caution Note:

Muscles have visco-elastic property. Hence be aware and don't overstretch so as to prevent intra muscular sore. At the same time don't under stretch for better therapeutic effect.

General Note: Desk site stretches minimise the work strain only! Core muscle strengthening exercises (Go through Earlier issues) also have to be practiced at home at least weekly thrice to cope with the day-to-day desk and home work!
